## Abstract

A Smart TV device is a television set or a set-top box for a television set that provide advanced computing ability and have an Internet access. Such devices provide access to online services, interactive media, user-generated content and allow to execute custom applications.

This demo introduces “Explain the Word” application for LG Smart TV. It is a game, in which teams of two or three players compete in understanding teammates as fast as possible. The game consists of consecutive one-minute turns for each team. During a turn one of the team members becomes host and has to explain to others the word displayed on the TV screen without using paronymous and teammates have to guess the word. When the word has been guessed or the host chooses to skip it the next word is shown on the screen. The number of guessed words determines how many steps the team moves forward on the game board. The first team to reach end of the game board wins the game.

**Index Terms:** Smart TV, LG, Game.
