Results of Mobile Tech Week in N. Novgorod

On May 11-15, FRUCT, Nizhny Novgorod State University, Nokia Siemens Networks, Nokia and Intel organized week of mobile technologies in Nizhny Novgorod. The event program consisted of a student seminar, trainings of MAEMO5 and Qt for beginners, and Intel Atom Day.

The next event in Nizhny Novgorod is scheduled for the second half of July, it will open summer school on wireless and mobile technologies.

Take part in telecommunications summer school

We welcome you to take part in the international summer school on telecommunications organized by Lappeenranta University of Technology. The school will be held on August 18-20 in Lappeenranta, Finland. Further details are available at <http://www2.it.lut.fi/comlab/ssotc/ssotc10/>.

All teams must get access to their project pages

The renewed version of FRUCT site <http://fruct.org> allows granting edit right to the FRUCT project pages of each individual team. If your team still has not get access right to the project page, please contact info@fruct.org and do not forget to register yourself at <http://fruct.org>. We kindly ask all teams to make up-to-date the project pages.

Good level of submissions to the partner events

FRUCT is going to have special sessions at two large and respected conferences that will be held in the autumn, i.e.: 8 papers were submitted to AIS/CAD congress and 4 papers to UbiComm conference.

About FRUCT

FRUCT is an open-innovation framework for strategic R&D cooperation between industry and universities. The program was established in 2007 by Nokia Research Center, Saint-Petersburg University of Aerospace Instrumentation and University of Turku and has by now become the most significant and actively growing cooperation framework between leaders of ICT industry and universities in the Baltic region. The FRUCT principle is in removing cooperation entering thresholds by setting R&D projects run by students under direct joint tutoring of industrial and academic experts. The FRUCT activities are sponsored by Nokia and Nokia Siemens Networks.

Nokia to join the Skolkovo project as a co-founder

Russian President Dmitry Medvedev has welcomed plans from Finnish mobile giant Nokia to become a founding member of the Russian Skolkovo high-tech research hub.

Nokia President and CEO Olli-Pekka Kallasvuo said at a meeting with Medvedev that the company "would be glad to see its representative in the governing bodies of the project."

8th FRUCT conference forum is open

You are welcome to visit the newly opened [forum](#) dedicated to the 8th FRUCT conference. We welcome you to provide your feedback regarding general questions of the conference organization and also leave your comments what lectures and trainings you would like to see at the conference.

RSS newsreader for FRUCT.org

Please take a look at the [RSS newsreader](#) for FRUCT.org site, developed by Alexander Trufanov. At the same page you can find instructions on how to use the Ovi Application Wizard, which was recently released by Nokia.

FRUCT in social networks

You are welcome to join FRUCT groups in [vkontakte](#) and [facebook](#) social networks.
