

Personalization of the FRUCT Social Network

Valery Kirkizh

State University of Aerospace Instrumentation

Saint-Petersburg, Russia

FRUCT Overview

- Cooperation involving top academy and industry institutes from Europe and Russia
- Neither company, nor community
- Distributed groups of people
 - Many countries, cities and universities
- Distributed projects
 - Different knowledge branches,
 - Different members' educational levels

FRUCT advantages

- Largest Open Innovations Framework in Europe and Russia
- Members get new competencies, expand professional network and share their experience
- Develops regional ecosystem around ICT and mobile technologies

Open issues

- Plural society without clear internal structure
 - Difficult to promote new activities and control existing ones
- FRUCT Members diversity
 - University labs and FRUCT members are geographically separated
- Management problems
 - Resources are spend inefficiently

Solution: social network

- Not only new area for discussions
- The instrument makes the current structure more controllable and reliable consequently
- Automatically updated overview
- Convenient instrument to evaluate the particular member activity, skills and knowledge
- Easy way to share experience between groups and members
