

# Monitoring and Prediction of Transport Protocols Throughput for Complex Networks. Demo Session.

- Aim: Prediction of throughput
- Minimal working prototype
  - ▶ Probe and collector
  - ▶ Prototype analysis tool
  - ▶ Flow filtering
  - ▶ Aggregating and long-term storing
- Testing
- Analysis of results

- 1 Emulation of background traffic
- 2 Emulation of past
- 3 Prediction
- 4 Launch and measurement of target flow
